Abstract (en)
[origin: WO0186047A1] The invention relates to a tuck-in selvedge motion (1) for a weaving machine, for tucking an end of a weft yarn into a shed. According to the invention, a holder (15) is provided with a rotationally arranged insert (33) which is connected to a source of compressed air and which has at least one blasting opening (37). The blasting direction of said blasting opening can be adjusted by changing the position of said blasting opening (37).
