Abstract (en)
[origin: WO0186084A1] An insulating preform made of a mass of glass fiber resembling wool obtained by extreme bulking of glass fiber and by a support for the glass wool, the support including a net being of the same material of the glass wool and defined by a non-bulked glass strand. The glass wool and the net are held together so as to make geometrical shapes without any glue and/or impregnating substance.
