Abstract (en)  
[origin: WO0186760A1] The invention relates to an electric plug-in connector provided in the form of a T-coupler (2). The T-coupler (2) is comprised of a first junction (4), which is configured as a plug-in connection with at least one plug-in contact (10), of a second and a third junction (6, 8), each of which having at least two connections that can be separately contacted, and of at least one connecting element that connects the connections, which can be separately contacted, to one another and/or to the at least one plug-in contact (10). The invention also relates to a field bus system comprising a T-coupler (2) of the aforementioned type.
