Abstract (en)

[origin: WO0187133A1] A dishwasher basket (1) contains a rack (3) the height of which can be vertically adjusted in one or more positions, which is manufactured separately from the basket (1) and can be attached to said basket (1). The vertically adjustable rack (3) consists of a bearing surface (11) on which the crockery such as cups, mugs etc are placed; bearings (5) which form the rotational axis of the vertically adjustable rack (3); support pieces (4) that prevent the vertically adjustable rack (3) from making an undesirable rotational movement when the crockery such as cups, mugs etc are placed; claws (6) that enable the vertically adjustable rack (3) to be held at the desired height and connection pieces (7) that enable the vertically adjustable rack (3) to be attached to the side wall of the basket.
