Abstract (en)

[origin: WO0185399A1] The invention relates to a machine tool, especially a hand machine tool, comprising a drive motor (12), which is located in a housing (10), and at least one regulating device (14, 16) by which means at least one characteristic value of the drive motor (12) and/or a gear can be permanently regulated during an operating phase. According to the invention, said regulating device (14, 16) has a resetting unit (18, 20) which resets the regulating device (14, 16) to a starting position according to at least one operating parameter.
