Abstract (en)

[origin: WO0186470A1] The present invention is a method for naming or numbering subscribers on a network using their international telephone number, or any other global unique number as a sub-zone label of a dedicated primary zone in the said network. Subscriber's devices can be named as hosts on his assigned zone. This method can be used also with any other global unique number or a combination of two-letters-country-code and said number - for example, two-letters-country-code with passport number, identity card number, PIN number or National Insurance number.
