Abstract (en)

[origin: WO0189951A1] The invention concerns a method which consists in mounting a ring or rigid peripheral base (7) designed to be closed by a sealing and tight inner seal (8) at the circumference of the end part (10) of said container or said package, designed to form an opening to provide access to the content or for emptying same. Said ring can receive a moulded or clipped on cover on one of its edges. The invention also concerns the container provided with said closure member.
