Abstract (en)
[origin: EP1284232A1] In an elevator apparatus, mounting brackets are fixed to top portions of a pair of guide rails, respectively, and a machine base is fixed between the mounting brackets. A hoisting machine for raising and lowering a car and a counterweight is supported by the guide rails by being suspended from the machine base. A bracketing for preventing the hoisting machine from swaying by engaging the guide rail is attached to the hoisting machine. <IMAGE>
