Abstract (en)

[origin: EP1284477A2] Production of a marking sleeve arrangement (1) having a number of marking sleeves (7) provided with printed marking signs comprises flattening and rolling at least two parallel interconnected tube sleeves (2, 3) to form a roll. A specified number of marking sleeves having at least two parallel tube sleeves for a pre-determined quantity of tubing is printed with marking signs. The individually printed marking sleeves are then separated from each other and attached to the tubing. An Independent claim is also included for a marking sleeve arrangement produced by the above process. Preferred Features: Adjacent marking sleeves are printed with the same and/or corresponding marking signs.
