Abstract (en)
[origin: WO0191599A1] The invention concerns a reservoir and applicator system adapted to contain a cosmetic composition. The system comprises a single element (10) made of compressible material wherein is provided a cavity (12) forming a reservoir adapted to receive said composition. Said single element (10) has a first end (14) and a second end (18) forming said applicator whereof the application surface (20) consists of an outer wall of said second end (18). The cavity (12) is extended by a passage (16) emerging into said second end (18), whereby said composition is adapted to be transferred from said reservoir to said application surface (20) to be applied.
