Abstract (en)

[origin: WO0168259A1] An automated specimen processing apparatus (10) for dispensing a reagent onto a mounted specimen comprising a support framework (20), at least one reagent vial holder (120) movable arm (30), multifunction Z head (70). The device also includes a dispensing means that comprises at least one reagent tip head (90), first control means for positioning the tip head, means for withdrawing fluid from the vial, and a second control means to detect the fluid level in the reagent vial.
