Abstract (en)

[origin: WO0189897A1] The invention relates to a method for indicating the current driving state of a vehicle with several driving system devices to the driver and to a device for carrying out this method. The driving system devices generate output signals depending on the current driving state and these output signals are used to produce an indicating signal for an indicating device of the vehicle. The indicating device generates an indication to the driver in order to convey information concerning the current driving state.
