Abstract (en)

[origin: WO0190824A2] The invention concerns a device for displaying time comprising a dial indicating hours and minutes, and indicator showing hours and an indicator showing minutes. The device is characterised in that the minute indicator comprises two sectors, a first sector graduated over 60 minutes and indicating the minutes ahead of the actual minute and a second sector whereof the duration (D) corresponds to the lead accumulated in the first mode.

[origin: WO0190824A2] The invention concerns a device for displaying time comprising a dial indicating hours (2) and minutes, and indicator showing hours (1) and an indicator (3) showing minutes. The device is characterised in that the minute indicator comprises two sectors, a first sector graduated over 60 minutes and indicating the minutes ahead of the actual minute and a second sector whereof the duration (D) corresponds to the lead accumulated in the first mode.
