Abstract (en)
[origin: WO0188777A1] The invention concerns a method enabling a person (10) access to multimedia contents (CM), available on a network (12) comprising the following steps: the person (10) provides himself with a value unit (UV) from a distributor (11); when connecting to the network (12), the person swaps said value unit for access to a specific multimedia content (CM). The invention also concerns a value unit support for use in said method.
