Abstract (en)

[origin: EP1286119A2] The baking trolley has a door and a carrier unit. The centering element, which centers the door on the carrier unit in the assembled state, covers at least part of the endface (17) of a holding element (18) fixed to the door, and serves to protect the endface, possibly enclosing it. The holding element may be in the form of a hollow strip.
