Abstract (en)

[origin: WO0232282A2] The dishwasher basket (9) consists of one or more crockery holding rack(s) (1) that is produced independently of said basket (9) and that can be attached to the basket (9), and a locking mechanism (4) located on the basket (9), which is used for attaching the crockery holding rack (1) to the basket (9). The crockery holding rack (1) consists of the supporting wires (2) placed on the same plane in parallel to each other, a connecting wire (3) and a locking wire (11). The crockery holding rack (1) is fitted by means of its ends to the rotation recess (5) at the lower end of said locking mechanism. The crockery holding rack (1) can be rotated in the rotation recess (5) taking the connecting wire (3) as its rotational axis and is brought to a vertical position by fitting the locking wire (11) into the blocking recess (6) at the upper end of the loading mechanisms (4).
