Abstract (en)
[origin: WO0187437A2] The invention relates to a jigsaw puzzle comprising pivotably mounted pieces. The game comprises at least two pivotably mounted or arranged pieces having a diameter that is bigger than the gap therebetween. At least one part is removed from at least one piece, said part covering at least superimposed adjacent piece intersecting surface. The aim of the game is to put the pieces in a determined position which is made difficult due to limited rotation of said pieces.
[origin: WO0187437A2] The invention relates to a jigsaw puzzle comprising pivotably mounted pieces (A,B). The game comprises at least two pivotably mounted or arranged pieces having a diameter that is bigger than the gap therebetween. At least one part is removed from at least one piece, said part covering at least superimposed adjacent piece intersecting surface. The aim of the game is to put the pieces in a determined position which is made difficult due to limited rotation of said pieces.
