Abstract (en)
[origin: WO0194709A1] The invention relates to a gutter element (1), comprising a gutter body (2) on whose side walls (3, 4) sealing means are provided, and a cover (8) which is lockably fixed on the gutter body (2). The aim of the invention is to provide an easy to mount locking device for a cover to be placed on a gutter element. The device should also prevent rattling noises from being produced when the cover is driven over. To this end, at least one locking slider (9) which is subject to a spring (10) is provided. Said locking slider engages with at least one surface (14) on at least one guiding surface (20) on the cover (8) and on the sealing means on the side walls (3, 4) of the gutter body (2) and holds the cover (8) on the gutter body (2) in a clip-like manner.
