Abstract (en)
[origin: FR2810088A1] The bearing for mounting a steering wheel (44) has a fixed external section (1) and an internal section (8) which can rotate, and ball bearings (12) mounted between them. Sensors (22, 23) detect the degree of rotation of the steering wheel. The outer end (10) of the internal section has bores (11) allowing the steering wheel to be screwed to it and the outer section has a flange (3a) which allows it to be screwed in position.
