Abstract (en)
[origin: WO0194866A1] The invention relates to a method for drying sludge, in particular sewage sludge, by creating a granulate from the dried product. According to said method, a mixture of a carrier material consisting of recycled sludge which has already been dried and liquid sludge is fed to a dryer (6). The invention is characterised in that the dried product is fed to a sediment separator (8) after the dryer (6) and is stored intermediately in the former in an intermediate container that is placed immediately downstream of said separator. The invention also relates to an installation for carrying out said method.
