Abstract (en)
[origin: WO0193109A2] A method for increasing transfer quality between a content requestor and a content source on a content distribution system. The method involves determining transfer quality between the requestor and various content sources. The determination is made from the requestor's perspective. After determining transfer qualities for the various content sources, the requestor provides the transfer qualities to a selector on the content distribution system. The selector uses the determined transfer qualities select a content source to supply the requestor.
