Abstract (en)
[origin: EP1287758A1] The link (1) has two hollow components (2,9) attached to the bracelet and watchcase. An exterior sintered decorative component (18) is secured to the hollow components such that they partially cover the second hollow one. Mechanical device (17) allows translation between the components in the direction of bracelet to apply external decorative component against the decorative component of the watchcase.
