Abstract (en)

[origin: WO0072343A1] A manual control device (38) for use in the health care sector, comprising a keyboard (38) for the actuation of functional units. The aim of the invention is to create a control device which can be used in the health care sector, whereby a large number of functional units can be controlled in a simple manner. A display device (40) is thus associated with said keyboard (38) and a control device is provided in order to control the display device (40) and the keyboard (38).
