Abstract (en)

[origin: DE10144106C1] The switch has an electrical contact device with a contact carrier having a coupling bolt for providing a pivot connection with a lever device of the switch operating drive, a clamping element (28) holding the switch shaft (8) of the operating drive in a fixed position, for removal and replacement of the contact device. An Independent claim for a method for removal and fitting of an electrical contact device for a power switch is also included.
