Abstract (en)
[origin: EP1289066A2] The conductor contains at least one core surrounded by insulation. The connector has a contact spring (15) with a contact blade for stripping the conductor insulation, and a contacting section for contacting the conductor core(s). The insulating housing and/or a contact actuator, guided in the insulating housing, have a bore for inserting a conductor, into which is insertable a guide sleeve (110) with a central bore (112) for inserting the conductor(s). Independent claims are included for the guide sleeve.
