Abstract (en)

[origin: EP1289338A2] The method involves selectively setting at least one cooking procedure with a predefined first constant or a predefined first variable heating power profile and/or at least one different temperature maintenance procedure with a second predefined constant or second predefined variable heating power profile. A control device has an arrangement for setting a first and/or second procedure. AN Independent claim is also included for the following: an arrangement for controlling a cooking device with at least one cooking zone and at least one cooking chamber, especially a domestic cooker, and a cooker hob with an inventive arrangement.
