Abstract (en)

[origin: WO0183552A2] The present invention relates to human SEZ6 (hSEZ6) polypeptides, and isolated nucleic acids that encode at least one hSEZ6 polypeptide. Vectors, host cells, transgenics, and chimeric mammals comprising hSEZ6 polynucleotides and/or polypeptides, as well as methods of making and using thereof, and hSEZ6 -specific antibodies are included in the present invention.
