Abstract (en)
[origin: WO0190501A1] The invention relates to a room divider (1) used in the surface layout and subdivision of rooms, in particular offices, exhibition areas and living rooms. Said room divider is characterised by two or more membranes (2) which are attached to at least one first upper point in the room, or to the ceiling, and to at least two lower points below said first point(s) or ceiling. Each membrane (2) also forms an outer wall surface on both sides of the room divider (1).
