Abstract (en)

[origin: WO0192967A1] Disclosed is an applicator element for providing a liquid colouring agent coating, especially used to colour a latent image carrier in a device used for electrographic printing or copying. The surface of the applicator element (26) has a structure which is provided with a plurality of areas (78, 80, 86, 88) enabling drops to be removed more easily from the liquid coating.
