Abstract (en)

[origin: WO0196997A1] The invention concerns an electronic apparatus incorporating a circuitry and components such as storage units, microprocessors and the like, at least a software for at least a programme, optionally a display screen, a radiation emitter, a receiver, a microphone, an earphone, a video camera and other functional assemblies, and comprising a control keyboard consisting of keys arranged in lines and columns in the manner of a substantially rectangular table. The invention is characterised in that the keyboard (5) comprises keys which are alphabetical and form five lines (71 to 75), or columns (11 to 15), and at least six columns (61 to 66), or lines (21 to 26), so as to correspond to the twenty-six letters of the Roman alphabet and, optionally to accentuation and/or punctuation symbols, and each of the keys which form one of the edges of the table has a vowel in the sequence A, E, I, O, U forming each the entry to a series of conventionally arranged consonants starting after said vowel and ending with the next vowel.
