Abstract (en)  
[origin: EP1291163A1] A first web and at least a second web of corrugated cardboard are produced in a first and at least one second production machine. A converging appliance along an operating direction (11) brings the webs of corrugated cardboard together. A processor jointly processes the webs of corrugated cardboard. The production machines have an appliance (1,14) for laminating one side of the cardboard web (9,15), and have unrolling appliances (12) for two covering layers (13,17).
