Abstract (en)

[origin: EP1291175A1] A cylinder section (33) carries at least part of a first image to (11-16) be printed. An at least axially movable casing element (31,35) in relation to the cylinder section carries at least one part of a second image to be printed. A ring (32,34) between the casing and the cylinder section is axially movable in relation to the casing and cylinder section. When the ring is joined to the cylinder section, it holds a further part of the first image; when joined to the casing, the ring holds a further part of the second image,
