Abstract (en)
[origin: EP1291465A2] The road marker plate (1), to define two traffic lanes or the division between two close traffic lanes, has a flat angled surface (8) along at least one of its longitudinal sides (2,3). At least one of the end sides (4,5) has a flat angled surface (10). A groove (11) is along the upper surface (6) of the plate, parallel to the longitudinal sides, to take at least one reflector. The plate is bonded to the road surface by an adhesive.
