Abstract (en)

[origin: EP1291470A1] A truss construction comprises a first truss and at least one further truss, wherein the trusses are fixed to each other via a coupling part (20). The coupling part herein comprises a basic element (21) having on a first side connecting means (52,55,56,36) for a manually releasable connection to a first coupling element (54A..D) and on at least one further side connecting means (52,55,56,36) for a manually releasable connection to a further coupling element (54A..D). Each coupling element (54A..D) is provided on a side remote from the basic element coupling members (30) for a releasable connection to a truss, which is connected to the basic element via said coupling members. <IMAGE>
