Abstract (en)
[origin: EP1293305A1] The tool holder has a clamping end with locking groove (4) to engage with a locking element (6). A sleeve (5) locking groove and element together, has an axially lockable stop element (7). The stop element is radially pre-tensioned and locks axially with a stop device (8), and may be formed as a leaf spring engaging axially behind a radial locking nose. The locking sleeve is positively connected to a manually operated freely moveable sliding sleeve (9).
