Abstract (en)

[origin: EP1293430A1] The machine has first and second conveyors (1,3) for first and second type of goods (A,B), and a packaging station (7) to form a packaging material hose (72). The machine also has a feeder station (2), in which second type goods are formed into a stack by the second conveyor, and placed by a conveyor part (4,10) on one good of the first type, to form a second group. The second group is held by a holder (5) to maintain its shape, and is moved into the material hose.
