Abstract (en)
[origin: EP1293611A1] The front loader has a link arm (1) to carry a tool (3), and a storage support (4) with pivoted support foot (6) and support strut (7). The strut is hinged with one end to a locking ratchet, which is held in a slide guide (12) and connected to a drive (16). The ratchet engages into locking toothing along the guide. The slide guide retains the ratchet with a tolerance, which exceeds the depth of the locking engagement, at right angles to the toothing. The ratchet is a double-armed lever, with the drive engaging on one arm, while the other arm forms a stop with the slide guide.
