Abstract (en)
[origin: EP1293673A2] The pump has a housing in which the roller set, bounded by at least one end plate (e.g. 6) is located. The runner set has a cam ring and a runner with vanes. The end plate has at least one counter-pressure field (15) adjacent to the runner set, to which the working pressure of the pump is supplied, and which may be connected to a kidney-shaped aperture (16) in the end plate.
