Abstract (en)
[origin: WO0195733A1] A sausage forming apparatus, comprising a supply device (2, 3) for supplying a stuffed sausage membrane with intermediate spaces, a first engaging unit (100) for engaging the stuffed sausage membrane with intermediate spaces at the location of the intermediate spaces, having a moveable first clamp (115) and a moveable second clamp (116) which, in a feeding position, are located next to one another, at least one second engaging unit situated at a distance from the first engaging unit for engaging the sausage membrane at a following intermediate space, having a moveable first clamp and a moveable second clamp which, in a feeding position, are located next to each other, operating means (111, 112) arranged for moving a second clamp of the first engaging unit and a first clamp of the second engaging unit from the feeding position to a closing position, in which the second clamp of the first engaging unit and the first clamp of the second engaging unit are located near one another.
