Abstract (en)
[origin: US2003167551A1] A garment comprises an outer shell (4) and an inner liner (2). The inner liner is a liquid-water-resistant and water-vapour-permeable material (particularly coated expanded polytetrafluoroethylene membrane) which has a discontinuous pattern of abrasion-resisting polymeric material on the side which faces the outer shell. The pattern may be a pattern of dots (26) of abrasion-resisting polymer. The outer shell may be removable from the inner liner.
