Abstract (en)

[origin: FR2810526A1] The heating container (1) consists of a stainless steel pan (2) which has a heat distribution plate (5) attached to the lower wall (4). An electrical heating element (6) is fixed to the heat distribution plate which has an aperture (12) to accommodate a diffusion plate (11). A temperature control unit is located on a mounting (10) attached to the diffusion plate which is at the colder end of the heating element. An independent claim is made for a kitchen liquid heating appliance which uses the container.
