Abstract (en)
[origin: WO0200355A1] The invention relates to a spray pistol comprising a pistol body (1); a nozzle system (9) which is arranged on the pistol body (1); a compressed air supply channel (22, 23) which is arranged in the pistol body (1) and which comprises a valve system (17) for controlling the supply of compressed air to the nozzle system (9); a regulating device (6, 13) for regulating the supply of the substance to be sprayed; an actuating element (12) for actuating the valve system (17) and the regulating device (6, 13); a device (31, 33, 37) for regulating the supply of compressed air to the nozzle system (9); and a pressure-measuring device (35, 38, 39) for detecting and indicating the pressure in the compressed air supply channel (22, 23). The aim of the invention is to create a compact and handy spray pistol comprising a pressure-measuring device which is easy to monitor when spraying. In order to achieve this, the pressure-measuring device (35, 38, 39) is integrated into the device (31, 33, 37) used to regulate the compressed air supply.
