Abstract (en)
[origin: WO0200819A1] A dry cleaning sheet is provided. The cleaning sheet includes a fabric layer formed from plurality of microfibers. The fabric layer includes a relatively low level of surfactant deposited on at least a portion of the fibers to enhance the wet cleaning capability of the sheet. The fabric layer may formed from a woven or nonwoven material. The surfactant is a solid or paste at room temperature and has relatively low water solubility. Cleaning implements and methods of cleaning surfaces using the cleaning sheet are also described.
