Abstract (en)
[origin: WO0202874A1] The invention relates to a moveable track connection between the ends of travel paths for wrap-around track-guided vehicles, especially magnetic levitation railway vehicles, comprising a set of S-shaped deformable bending points (1) for changing track, which has a bearing (4,6) along half the length thereof with a vertical axis of rotation, which cannot move in the longitudinal direction of the bending points (1).
