Abstract (en)

[origin: WO0201663A1] The invention relates to a fuel cell system comprising a fuel cell unit disposed in a fuel cell box. The fuel cell system also contains a gas generating system box. Components are assembled in the gas generation system box whereby the working temperature thereof is above 80 DEG C. Said gas generating system box is thermally insulated and the fuel box, gas generating system box, and, optionally, other boxes which contain components that transport or contain hydrogen gas are provided with means of ventilation.
