Abstract (en)

[origin: EP1295711A1] The present invention relates to a color printed liquid permeable laminated structure comprising a first liquid permeable layer and a second liquid permeable layer, the first layer is color printed on at least one of its surfaces prior being laminated to the second layer and stabilizing the laminated structure with a bonding means. These color printed laminated structures are particularly suitable for use in disposable absorbent articles for feminine protection, typically as so called 'secondary' topsheet in face to face relation with so called 'primary' topsheet, through which they are visible. <IMAGE>
