Abstract (en)

[origin: EP1295998A2] The insulation comprises mineral fibre panels (1) which in the area of the windows, doors or other building openings adjoin socket strips (3) of mineral fibre which are placed flush with the insulation layer which is to be placed on the surface of the window reveal (12) or the like. The socket strip can be aligned with its longitudinal axial direction parallel to the adjoining reveal. The strip can be a shaped element matching the shape of the reveal.
