Abstract (en)
[origin: WO0198079A1] A laminated glazing panel (10) is assembled in a frame (15) by a fixing member (21) secured to a surface of one of the sheets of glass at an attachment portion of the glazing panel. The attachment portion of the glazing panel comprises a weakness zone (23), for example a zone of non-adherence, positioned between the two sheets (11, 12) of glass adapted to facilitate separation of at least a portion of the glazing from its fixing member. The glazing panel (10) may be easily removed from its frame (15) at the end of its life.
