Abstract (en)

[origin: EP1297869A1] Sliding board for use on snow, especially as a ski (1), comprises a sliding board body whose width can be altered by an expanding device (9) over at least part of its length. The expanding device expands the sliding board body as a function of the load or bending of the sliding board. <??>An Independent claim is also included for an expanding device for the above sliding board. Preferred Features: The expandable section is provided on the rear end (4) of the board body.
