Abstract (en)  
[origin: EP1297953A1] Device for changing the position of a handling system in a turning drum of a sheet-fed printing machine comprises a handling oscillating shaft (5) positioned in the drum, a switching mechanism (12, 14, 15), and a locking mechanism (30, 33, 34), both of which are operated by a single adjusting cylinder (20). <??>Preferred Features: The switching mechanism is formed from a switching curve of a switching bar and a switching pinion. The locking mechanism consists of a locking roller and a locking lever.
